

Common Reporting Tool 1.7 (CRT)

GENERATE YOUR KAYE VALIDATOR® AVS
AND VALPROBE® RT REPORTS WITH ONE
DEDICATED TOOL

The Common Reporting Tool software is a comprehensive reporting utility that can be installed on a separate Windows PC or the Kaye Validation Console. It allows you to generate reports from Kaye Validator AVS or ValProbe RT Qualification, Calibration and Verification study files to document the results of your validation studies.

The Common Reporting Tool is seamlessly embedded in the validation console software suite. Qualification, Calibration and Verification study files created on your Kaye Validator AVS or ValProbe RT console and stored on the console and/or shared network drive can also be transferred to the computer with the Common Reporting Tool via the sync-out feature for report generation.

The ability to generate reports off validation console on a separate PC adds flexibility and efficiency to the use of the Kaye consoles. All files are encrypted, tamper-proof, and can only be accessed by the CRT software, ensuring you maintain the same data integrity as the Validation Console, but with the added comfort of working in your own office. The interface mirrors the patented Asset-Centric Concept featured on Kaye Validation Consoles to ensure a seamless transition for users. Included in the CRT software is support for Microsoft's Active Directory.

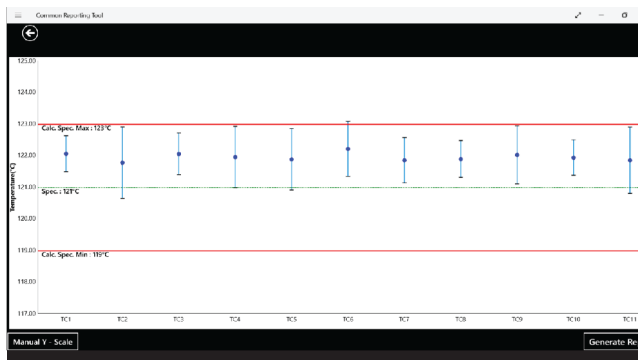

Active Directory* streamlines user management by ensuring users are assigned the appropriate permissions. A free 30-day trial is available for download on the Kaye

website. A base license can then be purchased for any number of PCs at your site that need to view and manage the reporting data.

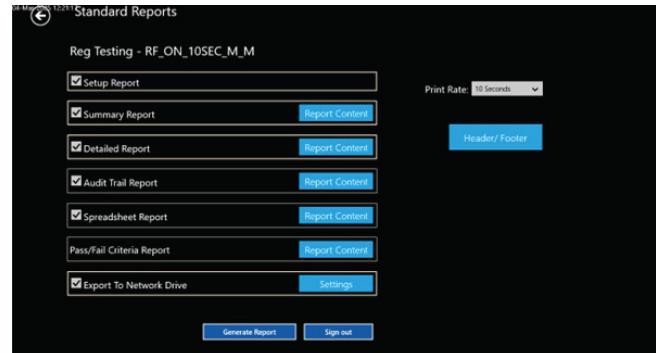

BENEFITS

- Seamless integration with Kaye Data Center: CRT 1.7 integrates seamlessly with Kaye Data Center, enabling enhanced data availability, unified access to study files, and streamlined reporting across the enterprise.
- Merge study files of Validator AVS with ValProbe RT (VRT) study files: Supports importing AVS study files into the VRT system, allowing generation of merged AVS/VRT reports.
- Merge up to three Kaye Validator AVS or ValProbe RT studies into a single report.
- IEC & AFNOR FD X reports can be generated for AVS study files and ValProbe RT study files (reporting on climatic and thermostatic chambers in compliance with AFNOR FD X15-140 or IEC 60068 for ValProbe RT).
- Expanded reporting capabilities: CRT 1.7 supports report generation, aligning with VRT 1.5's expanded logger support.

- Support for Calibration & Verification reports: Generate detailed Calibration & Verification reports directly from CRT 1.7 for complete documentation workflows.
- Enhanced data visualization capabilities for reporting: Supporting graph report generation with datasets exceeding 100,000 datapoints.
- Detailed Pass/Fail Report, including information on failed qualifications.
- Plug-in report feature allows importing customized report templates.
- Export to a dedicated network drive for easy paperless integration.
- View data and generate reports from a Validator AVS or ValProbe RT system from the convenience of your desk or home office.
- Read, manage, and store data on your secured network or server, allowing for easy access to files.
- Encrypted and tamper-proof files can only be read through the Common Reporting Tool software, ensuring data integrity.
- Incorporates Microsoft Active Directory for seamless and convenient user management.
