

# First in Thermal Validation & Environmental Monitoring

## Update on COVID-19

To be able to manage the impact of the **COVID-19 Pandemic** on our supply chain Kaye has put a special task force in place to review this dynamic situation regularly. We are monitoring the global development of our supply chain and while at present there is no reason for our Kaye customers to be concerned, you can help support us to manage and avoid future potential supply shortages.

## How can we help?

Our Centers of Excellence in USA/ Europe/ China and India are fully up-and-running and have enough stock for new products and spare parts. Local services for on-site or factory repair and recalibration are secured, and for any upcoming peak demands, can be served via our **Rental Fleet in USA and Europe**.

## How can you help?

To better assess, manage and coordinate the future demand with our suppliers we kindly ask you to check your current stock and upcoming needs for any Kaye equipment or services. Reach out to your local Kaye representative for any support needed.

If you have any additional questions, please contact your local Account Manager or e-mail us at: [kaye@amphenol-sensors.com](mailto:kaye@amphenol-sensors.com)

**Thanks for your cooperation as we continue to address this outbreak together.**
